

# INTRODUCING RAP 600 ROOM AIR PURIFIER

*Manufactured by Price Industries*

In today's world, indoor air quality is an increasing concern and the ability to provide clean air to room occupants is more important than ever. The Room Air Purifier (RAP) is an ideal option for improving indoor air quality wherever and whenever you need it. **The Ionizer technology used in the RAP has third party testing demonstrating effectiveness against a Coronavirus Surrogate.**

It is designed to continuously cycle air through a HEPA filter, eliminating unwanted dust particles, germs and contaminants. The air in the occupied space is consistently filtered to provide purified, clean air.

**UV Light Treatment** providing 360 degrees of high UV-C intensity light and is integrated into the interior of the RAP unit.

**Bipolar Ionization** proactively purifies indoor air. It also reduces airborne particles, kills virus, mold spores and bacteria.

## Features:

- 150-600cfm
- Easily removable and replaceable HEPA filter (minimum efficiency of 99.99% at 0.3 $\mu$ m particle size)
- Quiet operation
- MERV 8 pre-filter
- Energy efficient smart EC motor
- Adjustable fan speed
- 115 V power cord
- Antimicrobial powder coat finish
- Casters provided for ease of mobility.

## Rap Estimated Effectiveness:

### 300 CFM

- UV Dose: 1309  $\mu$ W-s/cm<sup>2</sup>
- 1st Pass Estimated Inactivation Rate - Coronavirus (Walker): 99%

### 600 CFM

- UV Dose: 654  $\mu$ W-s/cm<sup>2</sup>
- 1st Pass Estimated Inactivation Rate - Coronavirus (Walker): 90%
